

YASHI MISHRA

PROCESS ENGINEER

Lucknow, U.P. 226021 | +91-6386667501 | yashiimishra2211@gmail.com

PROFESSIONAL PROFILE

Motivated and detail-oriented Process Engineer with hands-on exposure to water and wastewater treatment processes. Experienced in preparation of P&IDs, hydraulic calculations, and process design activities. Proficient in treatment technologies including SBR, MLE, and A2O processes. Eager to grow and contribute meaningfully to process engineering projects.

EXPERIENCE

Process Engineer | VA Tech Wabag Ltd.

June 2024 – Present

- Executed process engineering activities for water and wastewater treatment plants (STP/WTP), including design calculations and technical documentation.
- Worked hands-on with SBR, MLE, and A2O biological treatment processes, developing practical understanding of process parameters and performance.
- Prepared and reviewed Piping & Instrumentation Diagrams (P&IDs) and contributed to design modifications as per project requirements.
- Performed hydraulic calculations and process sizing as part of project deliverables.
- Communicated with vendors for technical clarifications and floated enquiries for procurement of equipment and materials.
- Prepared technical documents, reports, and tender documentation to support project execution.
- Coordinated with cross-functional teams for data collection and project activities.

Process Engineer Intern | VA Tech Wabag Ltd.

January 2024 – May 2024

- Gained comprehensive exposure to company operations and the wastewater treatment industry across Process, Mechanical, Electrical, and Civil departments.
- Developed working knowledge of biological treatment technologies including SBR, MLE, and A2O processes.
- Studied and interpreted engineering documents such as PFDs and P&IDs to build foundational design skills.

Intern | Coca-Cola (Beverage Plant)

- Observed and understood operations of carbonated soft drink (CSD) beverage production processes.
- Gained exposure to Water Treatment Plant (WTP) operations and quality control practices.
- Learned about chemical dosing, basic treatment steps, and PET bottle manufacturing.
- Developed foundational understanding of industrial plant operations and safety practices.

ACADEMIC PROJECTS

- **Process Development for Biodiesel Production using Simulation** – Performed simulation and analysis of a biodiesel production process using chemical engineering software.
- **Study of Carboxylic Acid Separation** – Investigated separation techniques and process behavior for carboxylic acid systems.

SKILLS & COMPETENCIES

Process Engineering

- Water & Wastewater Treatment (STP, WTP)
- SBR, MLE, A2O Treatment Processes
- P&ID and Process Flow Diagram (PFD) Preparation
- Hydraulic Calculations
- Vendor Communication & Enquiry Floating
- Tender & Technical Documentation

Technical Tools

- Aspen Plus
- DWSIM
- MS Excel, Word, PowerPoint

Soft Skills: Willingness to Learn • Team Collaboration • Communication • Time Management • Leadership

EDUCATION

B.Tech – Chemical Engineering

Aug 2020 – Sep 2024

Chandigarh University, Punjab

Intermediate (ISC) | High School (ICSE)

City Montessori School, Lucknow

CERTIFICATIONS

- Aspen Plus Simulation – NPTEL
- Piping & Instrumentation Diagram (P&ID) – Udemy
